WORK EXPERIENCE

<div>Software Eng.</div> <div>May 2017- Present</div>	<div>Blockchain Software Engineering Intern</div> <div>Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions. It is a revolutionary technology that has the potential to transform many industries, including finance, healthcare, and supply chain management. As a Blockchain Software Engineering Intern, I was responsible for developing and testing smart contracts, as well as integrating blockchain technology into existing systems. I also worked on researching and implementing new blockchain-based solutions.</div>
<div>Software Eng.</div> <div>May 2016- Aug 2016</div>	<div>Software Engineering Intern</div> <div>As a Software Engineering Intern, I was responsible for developing and testing web applications. I also worked on researching and implementing new technologies, such as cloud computing and microservices. I was also responsible for maintaining and improving existing code.</div>
<div>Software Eng.</div> <div>May 2015- Aug 2015</div>	<div>Virtual Reality Research Assistant</div> <div>As a Virtual Reality Research Assistant, I was responsible for developing and testing VR applications. I also worked on researching and implementing new VR technologies, such as motion tracking and haptic feedback. I was also responsible for maintaining and improving existing code.</div>
<div>Software Eng.</div> <div>May 2014- Aug 2014</div>	<div>Research Intern</div> <div>As a Research Intern, I was responsible for developing and testing new software technologies. I also worked on researching and implementing new technologies, such as artificial intelligence and machine learning. I was also responsible for maintaining and improving existing code.</div>
